Portfolio: abdelrhman-elmsawy.github.io

PROFESSIONAL SUMMARY

Communications and Computer Engineering professional specializing in Networking and Cybersecurity, currently training as a Vulnerability Analyst & Penetration Tester through the Digital Egypt Pioneers Initiative (DEPI). Skilled in network infrastructure, routing and switching, firewall administration, vulnerability assessment, and penetration testing fundamentals, supported by hands-on labs and professional training programs. Strong analytical and problem-solving abilities, with proven high performance demonstrated by 97% and 92% training evaluation scores.

EDUCATION

Bachelor of Science in Engineering – Communications & Computer Engineering

Faculty of Engineering, Mansoura University |Expected Graduation: 2027 | GPA: 3.06 / 4.00

TRAINING & CERTIFICATIONS

DEPI Round 5 – Infrastructure & Security Track: Vulnerability Analyst & Penetration Tester

Digital Egypt Pioneers Initiative, Ministry of Communications and Information Technology | Jul 2026 – Dec 2026 | In Progress

- Networking Fundamentals, Network Penetration Testing, Web Application Penetration Testing, Android Penetration Testing, and Prompt Engineering.
- Working toward a capstone project applying penetration testing methodology across network, web, and mobile environments.

Red Teaming, Ethical Hacking, Bug Hunting & Penetration Test – Udemy | 101.5 Hours | In Progress

- Information Security fundamentals, Linux, network and web application penetration testing, Active Directory attacks, social engineering, and buffer overflow exploitation.
- Hands-on labs using Metasploit and Burp Suite.

Multivendor Firewall Solutions – Digital Egypt Youth Program, NTI | Jan 2026 – Feb 2026 | 72 Hours Final Evaluation: 92%

- Firewall deployment, security policies, traffic filtering, access control, and network protection concepts.

Network Infrastructure Training – NTI & ITIDA | Aug 2025 – Sep 2025 | 120 Hours | Final Evaluation: 97%

- Networking fundamentals, routing & switching, network infrastructure, and IT operations.

PROJECTS

Network Security Implementation Project | Jan 2026 – Feb 2026

- Configured firewall and access-control concepts in a simulated network environment.
- Identified common security threats and implemented basic mitigation strategies.
- Produced technical documentation covering network design, configurations, and testing results.

Network Infrastructure Design Project – Cisco Packet Tracer | Aug 2025 – Sep 2025

- Designed and implemented an enterprise-style network topology using Cisco Packet Tracer.
- Applied subnetting, VLAN segmentation, routing, DHCP, OSPF, NAT/PAT, SSH/Telnet, ACLs, Port Security, and DHCP Snooping concepts.
- Performed connectivity validation and troubleshooting to ensure reliable communication.

Network Security & Penetration Testing Lab

- Built a controlled security lab to practice reconnaissance, enumeration, vulnerability assessment, and basic exploitation workflows.
- Used Nmap and Wireshark for network discovery and traffic analysis, with Burp Suite and Metasploit for simulated web/network security testing.
- Documented findings, testing results, and basic remediation recommendations.

TECHNICAL SKILLS

Networking

- TCP/IP, Routing & Switching, OSPF, VLANs, Subnetting, DHCP, NAT/PAT, Network Infrastructure, Network Operations

Network Security

- Firewalls, ACLs, Access Control, Port Security, DHCP Snooping, Network Security, Vulnerability Assessment

Penetration Testing

- Reconnaissance, Enumeration, Vulnerability Assessment, Network Pentesting, Web Security Fundamentals, Penetration Testing Basics

Tools & Technologies

- Wireshark, Nmap, Burp Suite, Metasploit, Kali Linux, Cisco Packet Tracer

Operating Systems

- Linux, Windows

Programming & Databases

- Python (Basic), Bash (Basic), PHP, MySQL

SOFT SKILLS

- Teamwork & Collaboration
- Communication Skills
- Problem Solving
- Technical Documentation
- Time Management
- Continuous Learning

LANGUAGES

Arabic: Native

English: B1 (Intermediate)
